# respons<sup>®</sup> פוס

## **Total protein UC FS\***

Diagnostic reagent for quantitative in vitro determination of total protein in urine or cerebrospinal fluid on DiaSys respons<sup>®</sup>910

#### **Order Information**

Cat. No. 1 0210 99 10 921 4 containers for 120 tests each

### Method

Photometric test using pyrogallol red

#### Principle

Proteins form a red complex with pyrogallol red/ molybdate. The absorbance is directly proportional to the protein concentration.

#### Reagents

#### **Components and Concentrations**

| Reagent:         |                     |
|------------------|---------------------|
| Pyrogallol red   | 60 µmol/L           |
| Sodium molybdate | 40 µmol/L           |
| Standard:        | 1300 mg/L (1.3 g/L) |

#### Storage Instructions and Reagent Stability

Reagent and standard are stable up to the end of the indicated month of expiry, if stored at 2 - 8 °C, protected from light and contamination is avoided. DiaSys respons containers provide protection from light. Do not freeze the reagents!

#### Warnings and Precautions

- Each individual blood donation used for production of Total protein 1. UC Standard FS was found to be non-reactive when tested with approved methods for HBsAg, anti-HIV 1+2 and anti-HCV. As there is no possibility to exclude definitely that products derived from human blood transmit infectious agents, it is recommended to handle the standards with the same precautions used for patient specimens.
- 2 The Total Protein UC Standard FS contains sodium azide (0.95 g/L) as preservative. Do not swallow! Avoid contact with skin and mucous membranes.
- 3. In very rare cases, samples of patients with gammopathy might give falsified results.
- 4. Please refer to the safety data sheets and take the necessary precautions for the use of laboratory reagents. For diagnostic purposes, the results should always be assessed with the patient's medical history, clinical examinations and other findings.

#### Waste Management

Please refer to local legal requirements.

#### **Reagent Preparation**

Reagent and standard are ready to use. The reagent bottles are placed directly into the reagent rotor

#### Specimen

Urine or cerebrospinal fluid

| Stability [1]:                           |         |    |                  |
|--|---------|----|------------------|
| in urine:                                | 1 day   | at | 20–25 <i>°</i> C |
|  | 7 days  | at | 4-8 <i>°</i> C   |
|  | 1 month | at | -20 ℃            |
| in cerebrospinal fluid:                  | 1 day   | at | 20–25 <i>°</i> C |
|  | 6 days  | at | 4–8 <i>°</i> C   |
|  | 1 year  | at | -20 ℃            |
| <b>B</b> <sup>1</sup> <b>1 1 1 1 1 1</b> |         |    |                  |

Discard contaminated specimens. Freeze only once.

#### Calibrators and Controls

For calibration the DiaSys Total Protein UC Standard FS is recommended. The assigned value of the standard has been made traceable to SRM 927 reference material. For internal quality control DiaSys TruLab Urine controls should be assayed. Each laboratory should establish corrective action in case of deviations in control recovery

|                              | Cat. No.         | -  | ≺it s | ize  |
|------------------------------|------------------|----|-------|------|

|                              | 5 9180 99 10 061 | 6  | х     | 5 mL |

#### **Performance Characteristics**

Measuring range from 35 to 2900 mg/L total protein (in case of higher concentrations re-measure samples after manual dilution or use rerun function) Limit of detection\* 9 mg/L total protein

| On-board stability           | 2 weeks                |               |

| Slope                      | 1.01  |
| Intercept                  | 32.5 mg/L   |
| Coefficient of correlation | 0.996   |

### Reference Range [3,4]

Urine 24 - 141 ma/24 h Cerebrospinal fluid < 500 mg/L

\*\*\*The value is an approximate guideline only.

\*\* according to NCCLS document EP17-A, vol. 24, no. 34

Each laboratory should check if the reference ranges are transferable to its own patient population and determine own reference ranges if necessary.
