Q Dx Urine Test 4

**Diabetes testing is ^{In}complete
Without screening for Microalbuminuria**

The earliest marker of diabetic nephropathy & cardiovascular complications

Significance of Microalbuminuria

- Microalbumin is used for early detection of kidney damage in diabetes (diabetic nephropathy) and high blood pressure
- An important prognostic marker for kidney disease in
 - Diabetes Mellitus
 - Hypertension
- An indicator of subclinical cardiovascular disease
- Increasing microalbuminuria level during the first 48 hours after admission to an intensive care unit predicts elevated risk for acute respiratory failure, multiple organ failure and overall mortality.

MICROALBUMIN....DON'T MISS IT
